DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-11 and 23-28, drawn to method of identifying a B cell carrying a surface immunoglobulin molecule having a binding site for an antigen of interest.

Group II, claims 12-22, and 26-28, drawn to method of isolating identified B cells.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is a method of identifying B cells present in a sample carrying a surface immunoglobulin whereupon the sample is contacted with a labeled antigen of interest and a labeled receptor that specifically binds the immunoglobulin molecule so as to assess the presence of a signal that provides information indicative of the presence of B cell carrying surface immunoglobulin molecule; and Group II is a method of isolating B-cells whereupon VH- and VL- domains of identified B cells are cloned by introducing mutations in the sequences encoding VH- and VL- domains of at least one of the B cells resulting to amino acid substitutions, shuffling the domains, grafting at least one CDR of the cloned domains, and subjecting the resulting modified antibodies to further selection.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

3. This application contains claims directed to the following patentably distinct species of VH- and VL- domains consisting of amino acid SEQ ID Nos: 78, 80, 82, 84, 86, and 88; and encoded by nucleic acid SEQ ID NOs 60, 61, 79, 81, 83, 85, 87, and 89. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-28 are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1641

4. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
